Panasonic

New Aquarea L Generation
Air to water heat pumps

AQUAREA

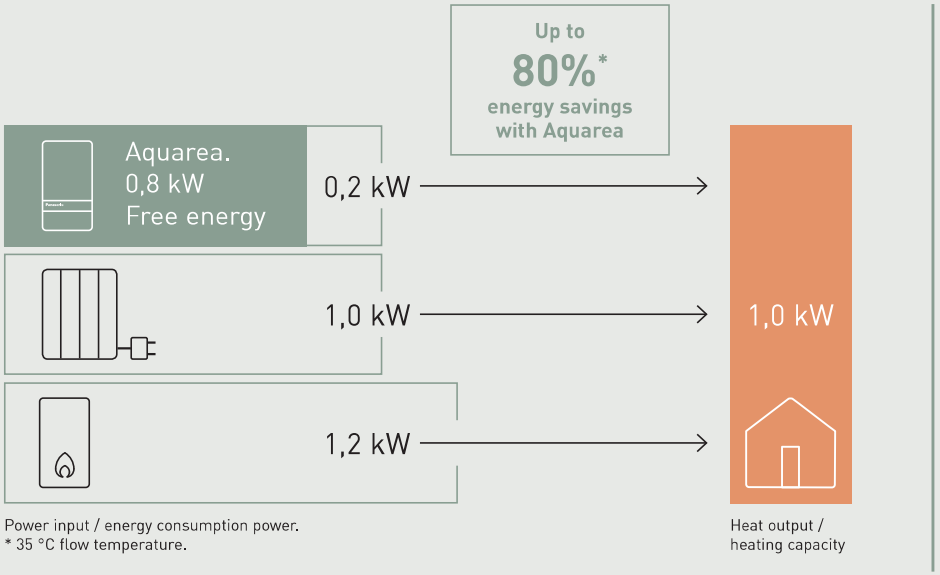

Contributing to a decarbonised society.

Aquarea air to water heat pumps range is a ground breaking low energy system for heating, cooling and domestic hot water production that delivers outstanding performance, aligning with our vision of a carbon-free society and our GREEN IMPACT plan.

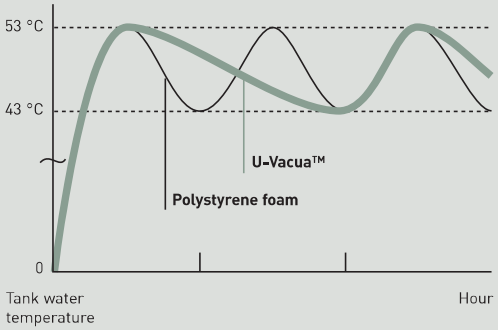

As much as 79% of the energy consumption of European homes comes from heating and producing DHW*. That's why, compared to conventional boilers and electric heaters, highly efficient Panasonic air to water heat pump technology can make a significant difference. Moreover, by converting heat energy in the air into household warmth, this technology helps reduce CO_2 emissions and environmental impact.

U-Vacua™: Vacuum insulation panel (VIP) technology developed by Panasonic.

Because they leverage VIP technology, U-Vacua™ panels offer 19 times the insulation performance of polystyrene foam. Since the system retains heat longer, it needs to heat up fewer times each day, resulting in energy savings.

Natural refrigerant GWP3. Save CO_2.

A next generation environment friendly heat pump that uses a low GWP refrigerant as a product that represents the Panasonic environmental concept of GREEN IMPACT.

U-Vacua™: Vacuum insulation panel

Panasonic

A low energy system for heating and hot water production.

Aquarea is a ground breaking low energy system for heating, cooling and domestic hot water production that delivers outstanding performance, even at extreme outdoor temperatures.

The peak of comfort, efficiency and low energy costs.

Leveraging heat pump technology and our unique expertise, Panasonic has been working for many years to help realise a sustainable society and enrich people's lives. The wide range of Aquarea products makes possible optimum solutions that are tailored to individual lifestyles while offering outstanding environmental performance.

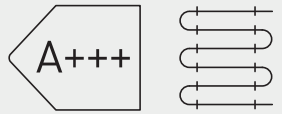

Panasonic has more than 60 years of heat pump experience, having produced an exceptional amount of compressors. Quality is what Panasonic stands for and this is a key factor for succeeding in the European market.
As a member of the European Heat Pump Association, the production of Aquarea in Europe and maintaining high security protocols in European servers for the Aquarea Smart Cloud, makes Panasonic a trusted heating partner.

Energy efficiency class up to A+.
Scale from A+ to F.

ErP 35 °C.
Energy efficiency class up to A+++.
Scale from A+++ to D.

* Rating conditions: Heating: Inside air temperature: 20 °C Dry Bulb / Outside air temperature: 7 °C Dry Bulb / 6 °C Wet Bulb.
Conditions: Water input temperature: 30 °C / Water output temperature: 35 °C. These energy efficiency might not apply to all models.

Panasonic

Introducing the new Aquarea L Generation of air to water heat pumps.

Aquarea L Generation is engineered with industry leading R290 natural refrigerant. It is the perfect solution for renovations, where a high water outlet temperature is required or homes looking for avant-garde heat pump with natural refrigerant.

Wi-Fi adapter included

Natural refrigerant

Employ natural refrigerant R290 with GWP 3.

Improved clean design

Refined outdoor design to be blended to the environment.

Remote control and maintenance

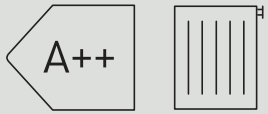

Aquarea Smart Cloud.
Aquarea Service Cloud.

High tank insulation performance

Tank boasts high heat retention thanks to U-Vacua™ [1].

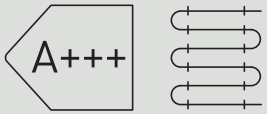

Further flexibility

- Hydraulic connection between Indoor and outdoor
- Less frequent maintenance with pre-installed magnet filter
- Operation without backup heating at -25 °C [3]
- Water outlet temperature maximum 75 °C at -10 °C outside temperature
- Can supply 55 °C hot water even at -25 °C outside temperature [3]
- Bluefin treatment protection on outdoor heat exchanger for harsh ambient conditions

High energy efficiency for retrofit projects

A++ energy class at 55 °C water outlet temperature.

High energy efficiency for new buildings

Top class ErP for heating at 35 °C water outlet temperature [2].

High energy efficiency for domestic hot water

DHW COP up to 3,6 [2].

Further energy savings

Domestic hot water up to 65 °C without heater for tank sterilization.

1] U-Vacua™ is a vacuum insulation panel (VIP) technology. 2] Scale from A+++ to D. Might not apply to all the models. 3] Tentative feature

Harmony between technology and home.

**In our daily lives, technology is attuned to you and the environment around you, without overstating the device or interface.
Just as the air is always around you even if you're not aware of it, Panasonic's technology continues to be in tune with your environment and your life.**

Harmony with the environment. Save livingspace.
A premium white, faithful to the Aquarea spirit underlined by the seamlessly integrated controller which provides a sleek black band across the unit.

GOOD DESIGN AWARD 2022
BEST 100

Like indoor equipment, the outdoor unit is designed to harmonize with architecture and the environment while quietly supporting the precious time spent with the warm family.
The outdoor units, with an anthracite grey colour which will dress the entire range, have been completely redesigned with an innovative design that will find its place in all spaces.

All in One unit and Bi-bloc indoor unit are designed to blend into your interior space effortlessly.

The outdoor unit is designed to harmonize with architecture and the environment with a quiet operation.

Panasonic's unique low noise architecture. The compressor, which is a major source of noise, is equipped with a double-bottomed structure to provide a safe, quiet structure that does not disturb neighbors in crowded residential areas.
